

marathon™
laundry machines

Meet the most innovative
and capable laundry
machine ever designed.

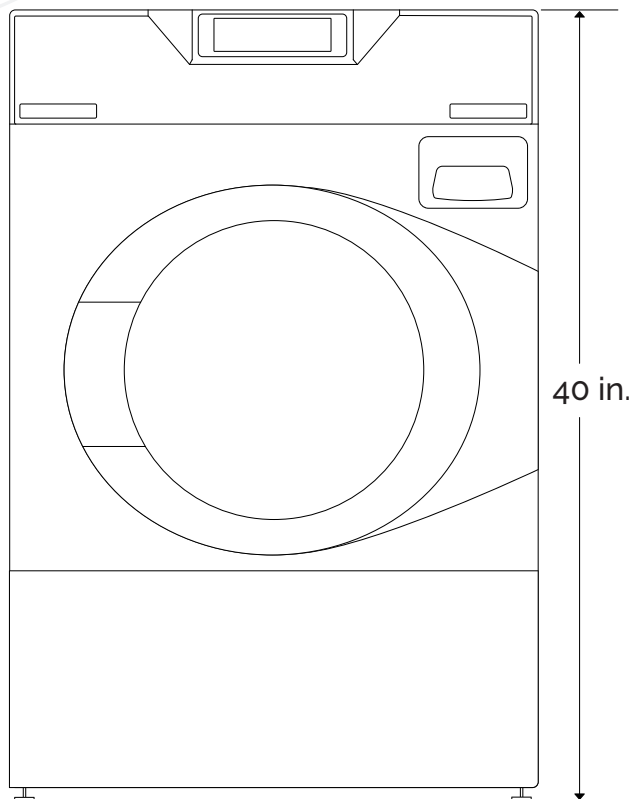

Free up your space.

One machine replacing two means having more space for activities. Add a folding table, an ironing table, or even a dog washing station to your laundry room.

The machine is full-sized — exactly the same width, height, and depth as almost all washing machines on the market

Specifications

POWER SUPPLY

220-240 VAC NEMA 14-30

SIZE

27" W x 40" H x 34" D (door closed)

27" W x 40" H x 58" D (door open)

WEIGHT

232 lbs (115 kg)

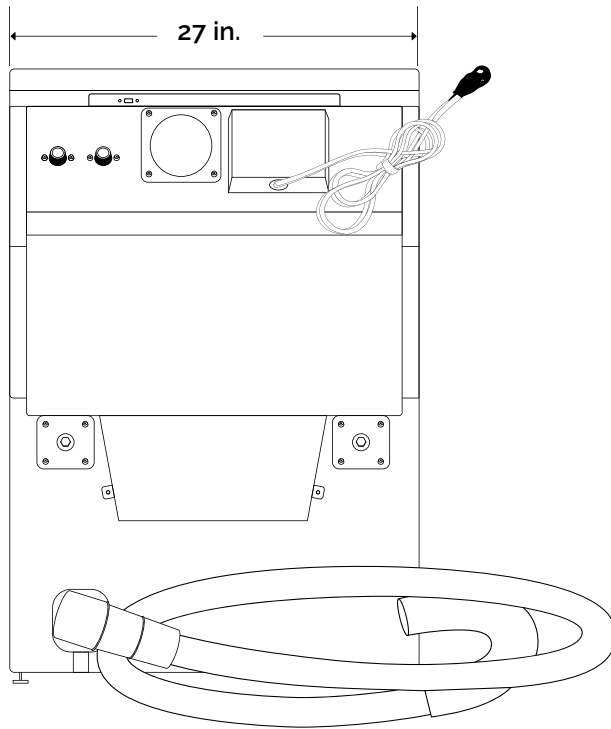

SPIN SPEED

1100 RPM

PERMISSABLE WATER PRESSURE

20-80 psi (1389-551 kPa)

Specifications

ELECTRICAL

120v or 240v (see models below)

EXHAUST VENT

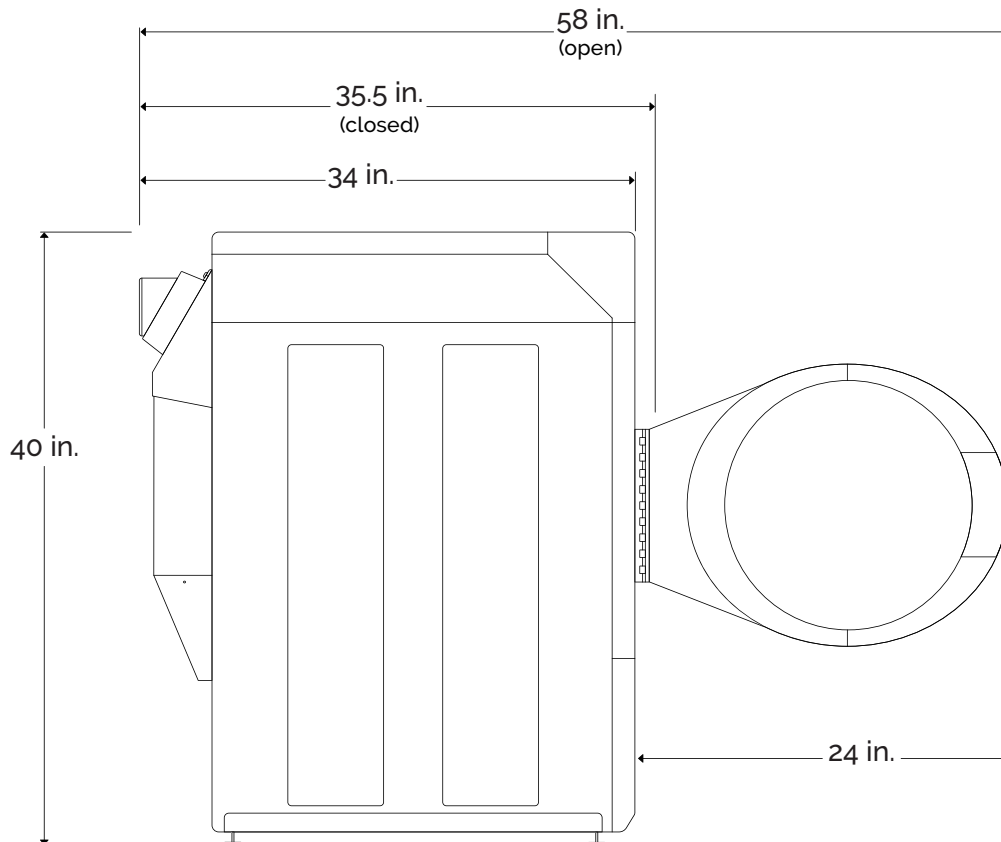

4" Standard (ducting not included)

DRAIN

1" flexible hose (included)

WATER HOSE CONNECTORS

Two 3/4" GH supply (included)

Smart and Connected

Do your laundry from anywhere.

Remembers your preferences.

Proven energy-saving features.

Customizable

You can choose precise times and temperatures for your cycles and save them with a name that's meaningful to you, like Nylon Jacket or Kitchen Towels.

Free updates

Get software updates and new features automatically over the air. Works with WiFi in your home.

Remote Laundry

The Marathon mobile app lets you control your laundry process from anywhere in the world. Get status, start/stop the machine, get alerts.

Configurable Drying

You can decide whether to dry automatically, or have the machine stop and wait for you to pull out some delicates.

Just tap the button to change between these options.

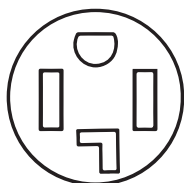

- 1. Auto dry.** **2. Wait for Okay.** **3. NO Dry Please.** **4. Dry ONLY.**

Model X

The Marathon Model X uses a standard 4-pronged dryer outlet, which is usually pre-installed in your laundry room if you previously had an electric dryer.

Note that electrical code requires 4-prong outlets, and if you have an older 3-prong outlet in your home, you will want an electrician to replace it.

240V
4-prong outlet

- **240 volts**
- U.S. Standard Hookups
- 7" Touchscreen Display
- Vented Dryer
- 3.8 cu ft. Capacity

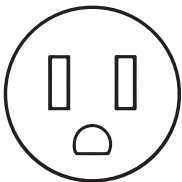

Model LT

The Marathon Model LT is an energy-efficient and versatile machine that can be installed anywhere with adequate plumbing. It is only 120 volts, which means it uses a standard 3-pronged outlet, as you see below.

If you currently have a gas dryer hookup (without a 240v outlet), you can use the Model LT with your existing hookups.

The Model LT is half the voltage of the Model X, but the dry times are about 1.5x longer than the Model X.

120V
3-prong outlet

- **120 volts**
- U.S. Standard Hookups
- 7" Touchscreen Display
- Vented Dryer
- 3.8 cu ft. Capacity

Express yourself.

The Marathon can be personalized with custom Accent Panels. There are more than 30 different styles, including gradients, solid colors, and patterns.
